

SALES EXCELLENCE ASSESSMENTSM

Sales Excellence AssessmentSM helps companies implement consistent and measurable sales talent coaching and development processes. This web-based assessment tool provides front-line sales managers the information they need to effectively improve sales force performance in both learning and development as well as opportunity identification, opportunity management, and relationship management.

The assessment first clarifies the organization's business objectives by requiring salespeople to rank the skills they believe they are exhibiting and the importance of those skills in their selling environment. Sales managers complete the same assessment in order to collect a 180-degree picture. This intelligence enables managers to improve the quality of coaching sessions to generate consistent results, and helps leadership understand areas of focus for development and training.

By helping create constructive dialogue between managers and their salespeople, *Sales Excellence AssessmentSM* supports thorough feedback on sales activities and behaviors that need to be addressed. Results can be communicated up, so C-level executives can better understand and support training and development initiatives.
